

Cash Equities IOI Disclaimer

September 2023

HSBC Global Markets' Cash Equities desks ("**HSBC**" or "**we**") regularly communicate trading axes and liquidity arising from customer orders with their client base. This may be done through a variety of media (which, at all times, must be in line with HSBC official policy) including (but not limited to) chat system, email, and telephone. Indications of interest ("**IOI**") for these purposes are conditional, non-binding expressions of interest that are communicated by HSBC to clients through Bloomberg and/or other channels including, but not limited to, directly via FIX. The below region-specific summaries are intended to provide a general overview of the basis in which our Cash Equities desks communicate IOIs to you. Please contact your HSBC representative for further information.

Asia¹

Asian trading desks generally follow the Asia Pacific Equities IOI Charter (<https://www.asifma.org/resource/asia-pacific-ioi-charter/>).

Additionally, please note:

- ◆ We may use C:1 (Client Natural – Block) or C:2 (Client Natural – Working) IOIs to represent customer orders where they have been received by us, whether or not these orders are working in the market.
- ◆ When we communicate H:1 (House Position - Unwind) and H:2 (House Position – Wanted) IOIs our intention is to enter these positions and not to replace or unwind (respectively) same day any resulting positions.
- ◆ IOIs are refreshed on a timely basis but not on a real time basis. While our IOIs are intended to reflect our existing orders/axes it is possible that due to changing circumstances an outstanding IOI may not accurately represent the status of an order at that specific point in time.
- ◆ We adopt a client tiering approach in relation to the dissemination of IOIs.

EMEA¹

EMEA trading desks generally follow the AFME/IA Framework for Indications of Interest (<https://www.afme.eu/globalassets/downloads/divisions/equities/afme-egt-framework-for-indications-of-interest.pdf>) and, where applicable, use of appropriate flags and qualifiers in line with established Bloomberg standards.

Additionally, please note:

- ◆ We may use C:1 (Client Natural – Block) or C:2 (Client Natural – Working) IOIs to represent customer orders where they have been received by us, whether or not these orders are working in the market.
- ◆ Clients will get priority on any on-going business left with us before we replenish or unwind any H:1 (House Position - Unwind) or H:2 (House Position – Wanted) IOI traded inventory. For H:3 (Market Making) risk facilitation, the expectation is that we unwind risk before continuing with the balance of client execution.
- ◆ IOIs are refreshed on a timely basis but not on a real time basis. While our IOIs are intended to reflect our existing orders/axes it is possible that due to changing circumstances an outstanding IOI may not accurately represent the status of an order at that specific point in time.
- ◆ We adopt a client tiering approach in relation to the dissemination of IOIs.
